---

During the recent AOPC meeting, I understood that the LWG had not yet entered the Arco post-removal sediment results and the extent of sediment removal into the database and GIS maps. Therefore, (EPA) AOPC #8 may change. Figure 4-33 of the 3/07 *Basis of Design Report, Revetment Source Control Measure* for BP Bulk Terminal 22T shows that LWG bioassay locations G155, G-157, G-160, and G-161 fall within the sediment excavation area.

Please contact me if you have questions.

Thanks-
